

Leandro Martínez

Junior Full Stack Developer | React · Next.js · TypeScript

Montevideo, Uruguay | +598 95 220 063 | leandromartinez.dev@gmail.com | linkedin.com/in/leandromartinezuy | github.com/leamartinez1707 | leandromartinez.com.uy

PROFESSIONAL SUMMARY

Junior Full Stack Developer with a strong frontend focus in React, Next.js and TypeScript, with hands-on experience building and maintaining software used in real business environments. Built and currently maintain [UruFix](#), a multi-tenant SaaS platform developed from a real operational need and currently used in production by a company in Uruguay. Experienced working directly with external software development teams in requirements gathering, functional QA/UAT, and feature prioritization and validation.

PROFESSIONAL EXPERIENCE

E-commerce & Web Development / Functional QA | Avelino Acevedo S.A.

April 2024 – Present — Montevideo, Uruguay

- Act as the functional point of contact between the company and an external software development team, collaborating directly with its Project Manager and QA team to gather requirements, clarify expected behavior, define priorities and validate delivered features.
- Perform functional QA/UAT on real business workflows and edge cases, documenting bugs with reproduction steps, expected vs. actual behavior and relevant test data, then following up with the development and QA teams to validate fixes.
- Designed and built the official [Mistyle Uruguay](#) website; manage its product catalog in production.
- Manage e-commerce operations across Mercado Libre, Wix and WordPress: listings, stock, content and sales.
- Handle customer service, invoicing and payment processing as part of daily operations.

Warehouse & Sales Assistant | Mancru S.A.

2021 – 2024 — Montevideo, Uruguay

- Prepared and controlled customer orders, ensuring accuracy and correct fulfillment.
- Managed warehouse organization and inventory-related operations.
- Assisted with import processes and followed incoming merchandise.
- Handled invoicing and daily operations using **NetSuite**.
- Covered the sales area for several months, assisting customers and managing sales-related tasks.

Various Operational Roles | Avelino Acevedo S.A.

2017 – 2021 — Montevideo, Uruguay

- Worked primarily in warehouse operations, preparing orders, organizing inventory and supporting day-to-day logistics.
- Assisted with sales, customer service and other operational activities.

MAIN PROJECT

Full Stack Developer | UruFix | [Live Demo](#)

2025 – Present — Independent Project — In production

- Identified a real operational need at Avelino Acevedo and independently designed and developed UruFix as a service-management platform, later evolving it into a multi-tenant SaaS product.
- Designed and developed a multi-tenant architecture with tenant-level data isolation, authentication and role-based access control.
- Built the platform's REST API, database architecture and frontend, supporting independent organizations within the same application.
- Integrated recurring subscriptions and payment processing with Mercado Pago, including secure webhook validation.
- Implemented analytics, reporting and notification features, and performed load testing and production monitoring.

Tech Stack: React, Vite, TypeScript, TanStack Query, Zustand, TailwindCSS, Node.js, Express, MongoDB Atlas, Redis, JWT, Mercado Pago, Resend, k6, Vercel, Railway

ADDITIONAL PROJECTS

Full Stack Developer | TuTécnico | Personal Project | [Live Demo](#) | [GitHub](#)

2025 – 2026 – Open source

- Built a full-stack platform connecting users with service technicians through location-based search, bookings, ratings and profiles.
- Implemented technician dashboards, authentication, memberships and geolocation features.

Tech Stack: React, Vite, TypeScript, TailwindCSS, NestJS, TypeORM, PostgreSQL, JWT, Google OAuth, Mercado Pago, Cloudinary

Full Stack Developer | Collaborative Projects | No Country — Remote

August 2024 | February 2025

- Built a real-time auction platform (React 18, STOMP, Zustand, Zod, Motion) deployed to Render.
- Developed the frontend of a HealthTech project with React and contributed to the backend with Express, in a simulated SCRUM environment.

- Coordinated with backend and design teams via GitHub Issues, Slack and Trello to ship MVPs.

Full Stack Developer | Nido — Shared Household Finances / [Live Demo](#)
2026

- Built a mobile-first PWA to manage shared and personal finances, including multi-user households, shared expenses, balances, savings goals and invitations.
- Implemented authentication and data isolation using Supabase Auth and PostgreSQL with Row Level Security (RLS), along with a responsive interface built with Next.js, TypeScript, TailwindCSS and shadcn/ui.

Tech Stack: Next.js, TypeScript, React, TailwindCSS, shadcn/ui, Supabase, PostgreSQL, RLS, Resend, Vercel, PWA

TECHNICAL SKILLS

Frontend: React, Next.js, Vite, TypeScript, JavaScript, TailwindCSS, HTML, CSS, Responsive Design

Backend: Node.js, Express, NestJS, REST APIs, JWT, TypeORM, Prisma

Databases: PostgreSQL, MySQL, MongoDB

Tools & Cloud: Git, Docker, Vercel, Railway, Render, AWS, Supabase, Neon

Payments & Testing: Mercado Pago, PayPal, Webhooks, Functional QA/UAT, k6, New Relic

Data & BI: Power BI, AI-assisted data analysis (in progress)

AI & Developer Tooling: AI coding agents, OpenCode, Claude Code, GitHub Copilot, MCP, Agent Skills

Web & E-commerce: Wix, WordPress, Mercado Libre

EDUCATION & TRAINING

AI Driven Data Analysis & Processing (Power BI) — INEFOP / Red Qualitas · March 2026 – December 2026 (in progress)

AI Agents & Automation Workflows with n8n, Make, Zapier and Relevance AI — In Progress

AI Powered Web Development: OpenAI, DeepSeek and Node.js — Udemy (completed)

Advanced Next.js and TypeScript Development — Udemy (completed)

React with TypeScript Specialization — Udemy (completed)

Full Stack Web Developer — Coderhouse · October 2022 – January 2024

Java Programming — BIOS (completed)

LANGUAGES

English: Upper-Intermediate (B2)

Spanish: Native
